

## Fluid Analysis Services

- Oil Analysis
- Coolant Analysis
- Diesel Analysis
- Filtergram Analysis
- Condition Monitoring Software

S.O.S™ Fluid Analysis is one of the most useful and important maintenance support programs available. For maximum protection, you need S.O.S oil sampling for all major oil-lubricated systems and S.O.S coolant sampling for cooling systems. Fluid analysis provides a reliable means to identify potential problems early, it can assist in minimising downtime due to unplanned repairs or catastrophic failures.

Detailed reports are provided in a timely manner to ensure you receive the maximum benefit from your fluid analysis program.

### It works the way you work

We will help you develop a plan uniquely suited to your operation, taking into consideration the various models of Cat (or competitive manufacturer's including stationary plant) machinery you operate, the kind of work you do and your current maintenance practices.
